## **ACCOLITE UNIVERSITY, JULY 2020**

# Java Multi-Threading Concepts Assignment Submission

By: Ayush Malik

I have shared 4 executions of my Blocking-Queue code. In order to capture the execution of the code I had restricted the producer to produce only 100 times. In the code which I have submitted these changes have been commented out. The producer produces continuously in the submitted code.

Note: No program execution terminates because the consumers continue to wait for the producer to produce some code.

```
"C:\Program Files\Java\jdk1.8.0 144\bin\java.exe" ...
Enter the No. of consumer threads you wish to create:
Enter the size of the Blocking Queue you wish to create:
No. of producer thread: 1
No. of consumer threads: 10
Producer adding Task 1 to the queue.
Producer adding Task 2 to the queue.
Producer adding Task 3 to the queue.
Producer adding Task 4 to the queue.
Producer adding Task 5 to the queue.
Producer adding Task 6 to the queue.
Producer adding Task 7 to the queue.
Producer adding Task 8 to the queue.
Producer adding Task 9 to the queue.
Producer adding Task 10 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 1 from the queue
Consumer Thread-1 removing Task 2 from the queue
Consumer Thread-1 removing Task 3 from the queue
Consumer Thread-1 removing Task 4 from the queue
Consumer Thread-1 removing Task 5 from the queue
Consumer Thread-1 removing Task 6 from the queue
Consumer Thread-1 removing Task 7 from the queue
Consumer Thread-1 removing Task 8 from the queue
Consumer Thread-1 removing Task 9 from the queue
Consumer Thread-1 removing Task 10 from the queue
Queue is empty. There is no task present in the Queue.
Queue is empty. There is no task present in the Queue.
Queue is empty. There is no task present in the Queue.
Queue is empty. There is no task present in the Queue.
Queue is empty. There is no task present in the Queue.
Producer adding Task 11 to the queue.
Producer adding Task 12 to the queue.
Producer adding Task 13 to the queue.
Producer adding Task 14 to the queue.
Producer adding Task 15 to the queue.
Producer adding Task 16 to the queue.
Producer adding Task 17 to the queue.
Producer adding Task 18 to the queue.
Producer adding Task 19 to the queue.
Producer adding Task 20 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-7 removing Task 11 from the queue
Consumer Thread-7 removing Task 12 from the queue
Consumer Thread-7 removing Task 13 from the queue
Consumer Thread-7 removing Task 14 from the queue
```

```
Consumer Thread-7 removing Task 15 from the queue
Consumer Thread-7 removing Task 16 from the queue
Consumer Thread-7 removing Task 17 from the queue

Queue is empty. There is no task present in the Queue.
Producer adding Task 37 to the queue.
Producer adding Task 38 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 37 from the queue
Consumer Thread-1 removing Task 38 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 39 to the queue.
Producer adding Task 40 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-2 removing Task 39 from the queue
Consumer Thread-2 removing Task 40 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 41 to the queue.
Producer adding Task 42 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 41 from the queue
Consumer Thread-1 removing Task 42 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 43 to the queue.
Producer adding Task 44 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-2 removing Task 43 from the queue
Consumer Thread-2 removing Task 44 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 45 to the queue.
Producer adding Task 46 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 45 from the queue
```

```
Consumer Thread-1 removing Task 46 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 47 to the queue.
Producer adding Task 48 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-2 removing Task 47 from the queue
Consumer Thread-2 removing Task 48 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 49 to the queue.
Producer adding Task 50 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 49 from the queue
Consumer Thread-1 removing Task 50 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 51 to the queue.
Producer adding Task 52 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-2 removing Task 51 from the queue
Consumer Thread-2 removing Task 52 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 53 to the queue.
Producer adding Task 54 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 53 from the queue
Consumer Thread-1 removing Task 54 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 55 to the queue.
Producer adding Task 56 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-2 removing Task 55 from the queue Consumer Thread-2 removing Task 56 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 57 to the queue.
Producer adding Task 58 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 57 from the queue
Consumer Thread-1 removing Task 58 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 59 to the queue.
Producer adding Task 60 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-2 removing Task 59 from the queue
Consumer Thread-2 removing Task 60 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 61 to the queue.
Producer adding Task 62 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 61 from the queue Consumer Thread-1 removing Task 62 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 63 to the queue.
Producer adding Task 64 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-2 removing Task 63 from the queue Consumer Thread-2 removing Task 64 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 65 to the queue.
Producer adding Task 66 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 65 from the queue Consumer Thread-1 removing Task 66 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 67 to the queue. Producer adding Task 68 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-2 removing Task 67 from the queue Consumer Thread-2 removing Task 68 from the queue
Queue is empty. There is no task present in the Queue.
Producer adding Task 69 to the queue.
Producer adding Task 70 to the queue.
Queue is full. No task is already taken by any of the consumer.
Consumer Thread-1 removing Task 69 from the queue Consumer Thread-1 removing Task 70 from the queue
Queue is empty. There is no task present in the Queue.
```
